DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 22-24 are rejected under 35 U.S.C. 102(b) as being anticipated by USPN 6,034,378 to Shiraishi. See Figure 6 which shows multiple lasers of different wavelength. The different beams are with optical systems 14, 16, and 18 and are aligned on the workpiece coaxially. Figure 6 also shows a wafer W on a movable wafer stage. The specification describes excimer lasers.

Allowable Subject Matter

Claims 1-21 are allowable over the prior art.

Claims 25 and 26 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Tsukihara et al describe a beam irradiator device.
